

**Request for Letters of Interest  
Complex Right of Way Plan Development  
Addendum #2**

**To: All Prospective Firms**  
**From: Doug Crabill, Assistant to the Director of Administration**  
**Date: March 4, 2014**  
**Re: West Market Street Bridge (Plat Plan)**

**West Market Street Bridge (Plat Plan)**

Due to the tight timeline for the completion of the right of way plans for the West Market Street Bridge and the advanced status of this project, the city is providing the plat plan for the West Market Street Bridge as part of this addendum. This will assist perspective consultants in the formulation of their schedule.

The project plans for this project are further developed than the other two projects (US 36 East Improvements and SRTS, Phase 2). As a result, plans are not being provided for these projects at this time. For US 36 East Improvements and SRTS, Phase 2, the latest available plans will be provided to the consultant upon selection to help facilitate creation of a cost proposal.
